# SMART SOLUTIONS FOR THE DIGITAL ECONOMY IN SEE

SOFIA, VRANA PALACE/05 JUNE 2018/10.00H

## ABOUT THE EVENT

Digital Economy and Society of the European Union member states are marked by bigger than expected disparities between different member states. The countries from the region occupy the last places. This is why, sharing experience and looking for common policies to catch up with the most advanced is important. Liberal solutions for the digital economy development should be looked for in political and business circles, academia and practitioners. We will try to:

- to promote digital economy and to share advanced experience in order to stimulate economic growth;
- to advocate for liberal solutions for faster development and integration in the Digital Single Market;
- to discuss new needs of public investment to speed up the digitalization of the economy to support growth and jobs;
- to discuss the role of the sharing/platform economy in transforming business and market economy;
